

=====

```
Starting portqry.exe -n 192.168.1.104 -e 135 -p TCP ...
```

Querying target system called:

192.168.1.104

Attempting to resolve IP address to a name...

IP address resolved to NAS3

querying...

TCP port 135 (epmap service): NOT LISTENING

portqry.exe -n 192.168.1.104 -e 135 -p TCP exits with return code 0x00000001.

=====

```
Starting portqry.exe -n 192.168.1.104 -e 389 -p BOTH ...
```

Querying target system called:

192.168.1.104

Attempting to resolve IP address to a name...

IP address resolved to NAS3

querying...

TCP port 389 (ldap service): NOT LISTENING

UDP port 389 (unknown service): LISTENING or FILTERED

Using ephemeral source port

Sending LDAP query to UDP port 389...

LDAP query to port 389 failed

Server did not respond to LDAP query

portqry.exe -n 192.168.1.104 -e 389 -p BOTH exits with return code 0x00000001.

=====

```
Starting portqry.exe -n 192.168.1.104 -e 636 -p TCP ...
```

Querying target system called:

192.168.1.104

Attempting to resolve IP address to a name...

IP address resolved to NAS3

querying...

TCP port 636 (ldaps service): NOT LISTENING

portqry.exe -n 192.168.1.104 -e 636 -p TCP exits with return code 0x00000001.

=====

```
Starting portqry.exe -n 192.168.1.104 -e 3268 -p TCP ...
```

Querying target system called:

192.168.1.104

Attempting to resolve IP address to a name...

IP address resolved to NAS3

querying...

TCP port 3268 (msft-gc service): NOT LISTENING

portqry.exe -n 192.168.1.104 -e 3268 -p TCP exits with return code 0x00000001.

=====

Starting portqry.exe -n 192.168.1.104 -e 3269 -p TCP ...

Querying target system called:

192.168.1.104

Attempting to resolve IP address to a name...

IP address resolved to NAS3

querying...

TCP port 3269 (msft-gc-ssl service): NOT LISTENING

portqry.exe -n 192.168.1.104 -e 3269 -p TCP exits with return code 0x00000001.

=====

Starting portqry.exe -n 192.168.1.104 -e 53 -p BOTH ...

Querying target system called:

192.168.1.104

Attempting to resolve IP address to a name...

IP address resolved to NAS3

querying...

TCP port 53 (domain service): NOT LISTENING

UDP port 53 (domain service): LISTENING or FILTERED

Sending DNS query to UDP port 53...

DNS query timed out

portqry.exe -n 192.168.1.104 -e 53 -p BOTH exits with return code 0x00000002.

=====

Starting portqry.exe -n 192.168.1.104 -e 88 -p BOTH ...

Querying target system called:

192.168.1.104

Attempting to resolve IP address to a name...

IP address resolved to NAS3

querying...

TCP port 88 (kerberos service): NOT LISTENING

UDP port 88 (kerberos service): LISTENING or FILTERED

portqry.exe -n 192.168.1.104 -e 88 -p BOTH exits with return code 0x00000002.

Starting portqry.exe -n 192.168.1.104 -e 445 -p TCP ...

Querying target system called:

192.168.1.104

Attempting to resolve IP address to a name...

IP address resolved to NAS3

querying...

TCP port 445 (microsoft-ds service): LISTENING

portqry.exe -n 192.168.1.104 -e 445 -p TCP exits with return code 0x00000000.

Starting portqry.exe -n 192.168.1.104 -e 137 -p UDP ...

Querying target system called:

192.168.1.104

Attempting to resolve IP address to a name...

IP address resolved to NAS3

querying...

UDP port 137 (netbios-ns service): LISTENING or FILTERED

Using ephemeral source port

Attempting NETBIOS adapter status query to UDP port 137...

Server's response: MAC address 000000000000

UDP port: LISTENING

portqry.exe -n 192.168.1.104 -e 137 -p UDP exits with return code 0x00000000.

Starting portqry.exe -n 192.168.1.104 -e 138 -p UDP ...

Querying target system called:

192.168.1.104

Attempting to resolve IP address to a name...

IP address resolved to NAS3

querying...

UDP port 138 (netbios-dgm service): LISTENING or FILTERED

portqry.exe -n 192.168.1.104 -e 138 -p UDP exits with return code 0x00000002.
